

# wavex

Wireless EMG systems

Designed to be the next best wireless EMG system in the world.

## The latest evolution

WaveX is not just the evolution of Wave Plus, but it is the result of years of research and feedback from the market, obtaining unparalleled user experience.

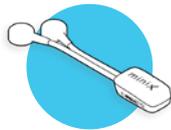

## Even more options

Now up to 36 channels, all new sensors and even more combinations.

### PicoX

A new pico with integrated IMU, slightly bigger for extended range.

### MiniX

Flexible EMG and IMU sensor with our trusted waterproof option.

### TrackX

Small and high sampling IMU sensor, synched with EMG, with analog output options.

### Picolite

The smallest EMG on the market, upgraded.

- Fast memory download via wifi
- Integrated IMU up to 500Hz
- 40 Configurable analog outputs
- 18/36 channel architecture
- New receiver with touchscreen

## 10x faster memory download protocols

The completely redesigned memory download system significantly cuts down the data download time.

Test	Memory download time
8 channels EMG+IMU Duration: 30 min	Wave Plus  30 min
	WaveX  3 min
